EANCOM® 2002 S3

COACSU

Commercial account summary message

Edition 2016 Upd. 2021

1. Introduction

Status

MESSAGE TYPE   : COACSU

REFERENCE DIRECTORY   : D.01B

EANCOM® SUBSET VERSION   : 004

Definition

A Commercial Account Summary message enables the transmission of commercial data concerning payments made and outstanding items on an account over a period of time. The message may be exchanged by trading partners or may be sent by parties to their authorised agents (e.g., accountants).

Principles

A Commercial Account Summary may;

- refer to Invoices, Credit Notes, Debit Notes, or payments over a period of time.

- refer to only one commercial account, in one payment currency.

- be initiated at any time by a party, depending upon agreement between the parties involved.

- provide information on a commercial account over a period of time. When the message is used in this way both payments made and amounts outstanding may be detailed.

- be used to provide aged analysis details on payments made and, or, amounts outstanding over periods defined by the parties.

- be used as a reminder of payment due for the current accounting period.

- be used as a demand for payment and detail penalties for amounts outstanding from previous accounting periods.

- be used to help in the reconciliation of commercial accounts when detailing payments made.

- be used to summarise other forms of commercial data such as pro-forma invoices.

The Commercial Account Summary can also be used as a response to a previous Commercial Account Summary. In that way it may be:

- An acknowledgement of receipt and understanding of data;

- A confirmation of acceptance;

- A notification of non-acceptance of all or part of the message;

- A COACSU response may refer to one or more outstanding items (e.g. Invoices);

- A COACSU may be responded to by one response message.

4. Segments Description

UNA - C 1   - Service string advice

> The service string advice shall begin with the upper case characters UNA immediately followed by six characters in the order shown below. The same character shall not be used in more than one position of the UNA.

UNB - M 1   - Interchange header

> This segment is used to envelope the interchange, as well as to identify both, the party to whom the interchange is sent and the party who has sent the interchange. The principle of the UNB segment is the same as a physical envelope which covers one or more letters or documents, and which details, both the address where delivery is to take place and the address from where the envelope has come.

Commercial Account Summary Heading Section

UNH - M 1   - Message header

> This segment is used to head, identify and specify a message.

BGM - M 1   - Beginning of message

> This segment is used to indicate the type and function of a message and to transmit the identifying number.

DTM - M 9   - Date/time/period

> This segment is used to specify any dates related to the commercial account summary.

FTX - C 99   - Free text

> This segment is used to provide additional free text information related to the entire message.

SG1 - C 9   - **RFF**

> A group of segments to provide references related to the heading section.

RFF - M 1   - Reference

> This segment is used to provide references related to the heading section.

SG2 - C 99   - **NAD-FII-SG3-SG4**

> A group of segments identifying the parties involved in the transaction, financial information for the parties, and the contact points and numbers.

NAD - M 1   - Name and address

> This segment is used to identify the trading parties involved in the commercial account summary process. Identification of the buyer and supplier of goods and services is recommended in the commercial account summary.

FII   - C 9   - Financial institution information

> This segment is used to identify the financial institution and account details of the party identified in the previous NAD segment.

SG3 - C 9   - **RFF**

> A group of segments for specifying any references relating to the identified party.

RFF - M 1   - Reference

> This segment is used to specify reference numbers related to the parties identified in the previous NAD segment.

SG4 - C 9   - **CTA-COM**

> A group of segments identifying the contact person or department for a trading party and specifying the communication channel and number.

CTA - M 1   - Contact information

> This segment is used to identify the department and/or person within the party specified in the NAD.

4. Segments Description

COM - C 9   - Communication contact

This segment is used to identify the communications number and the type of communications used for the person and/or department identified in the CTA segment.

SG5 - C 9   - **CUX**

A group of segments specifying the currencies and related dates/periods valid for the whole commercial account summary.

CUX - M 1   - Currencies

This segment is used to specify the currency applicable to all monetary amounts detailed in the message.

SG6 - C 9   - **PYT-MOA-PCD-DTM-FII-PAI**

A group of segments specifying the payment and penalty terms for the commercial account summary message.

PYT - M 1   - Payment terms

This segment is used by the issuer of the commercial account summary to specify payment terms applicable to the complete message.

MOA - C 9   - Monetary amount

This segment is used to specify monetary values which will be allowed or charged if the party receiving the message pays (does not pay) to terms.

PCD - C 9   - Percentage details

This segment is used to specify percentages which will be allowed or charged if the party receiving the message pays (does not pay) to terms.

DTM - C 9   - Date/time/period

This segment is used to specify any dates associated with the payment terms.

FII   - C 1   - Financial institution information

This segment is used to specify any financial institution information which is specific to the payment terms previously detailed.

PAI - C 9   - Payment instructions

This segment is used to specify any payment instructions which are specific to the current payment terms.

Commercial Account Summary Detail Section

SG7 - C 99999 - **DOC-DTM-SG8-SG10**

A group of segments identifying documents and their numbers, e.g. invoices or credit notes to which the commercial account summary refers. The group may contain details of the monetary values associated with the documents and any relevant dates. There must be at least one occurrence of this group within the commercial account summary message.

DOC - M 1   - Document/message details

This segment is used to identify the document for which summary information is being provided.

DTM - C 9   - Date/time/period

This segment is used to specify dates or periods relating to the documents given in the previous DOC segment.

SG8 - C 9   - **NAD-SG9**

A group of segments to identify parties and any associated references related to the current document.

NAD - M 1   - Name and address

This segment is used to identify the parties associated with the document identified in the DOC segment.

4. Segments Description

SG9 - C 99   - **RFF-DTM**

A group of segments for specifying any references relating to the party.

RFF - M 1   - Reference

This segment is used to specify reference numbers related to the parties identified in the previous NAD segment.

DTM - C 9   - Date/time/period

This segment is used to specify dates or periods relating to the references given in the previous RFF segment.

SG10 - C 99   - **MOA-TAX-SG11**

A group of segments providing total monetary values, tax information, and adjustment details for the currently referenced document.

MOA - M 1   - Monetary amount

This segment is used to indicate values associated with the currently identified document, e.g. amount remitted, invoice total amount, etc.

TAX - C 9   - Duty/tax/fee details

This segment is used to specify the type and rate of tax or duty applicable to the amount specified in the previous MOA segment.

SG11 - C 9   - **AJT-MOA-RFF**

A group of segments providing adjustment details related to the monetary value for the currently referenced document.

AJT - M 1   - Adjustment details

This segment is used to indicate the reason for an adjustment to the document monetary amount.

MOA - M 1   - Monetary amount

This segment is used to indicate the value of an adjustment made to the amount specified in the MOA segment in group 10.

RFF - C 1   - Reference

This segment is used to specify any references related to the previously specified adjustment details.

Commercial Account Summary Summary Section

UNS - M 1   - Section control

This segment is used to identify the break between the message detail and message trailer sections.

SG12 - C 99   - **MOA-TAX-DTM**

A group of segments specifying the total amounts, tax information, and any pertinent dates for the complete commercial account summary

MOA - M 1   - Monetary amount

This segment is used to indicate total values for the complete message and/or the breakdown of tax values for each rate of tax detailed in the following TAX segment.

TAX - C 9   - Duty/tax/fee details

This segment is used to specify the type and rate of tax or duty applicable to the amount specified in the previous MOA segment.

DTM - C 9   - Date/time/period

This segment is used to specify any dates associated with the monetary amounts specified in the previous MOA segment.

CNT - C 1   - Control total

This segment is used to indicate controls.

4. Segments Description

UNT - M 1   - Message trailer

This segment is a mandatory UN/EDIFACT segment. It must always be the last segment in the message.

UNZ - M 1   - Interchange trailer

This segment is used to provide the trailer of an interchange.

5. Segments Layout

This section describes each segment used in the EANCOM® Commercial Account Summary message. The original EDIFACT segment layout is listed. The appropriate comments relevant to the EANCOM® subset are indicated.

Notes:

1. The segments are presented in the sequence in which they appear in the message. The segment or segment group tag is followed by the (M)andatory / (C)onditional indicator, the maximum number of occurrences and the segment description.

2. Reading from left to right, in column one, the data element tags and descriptions are shown, followed by in the second column the EDIFACT status (M or C), the field format, and the picture of the data elements. These first pieces of information constitute the original EDIFACT segment layout.

   Following the EDIFACT information, EANCOM® specific information is provided in the third, fourth, and fifth columns. In the third column a status indicator for the use of (C)onditional EDIFACT data elements (see 2.1 through 2.3 below), in the fourth column the restricted indicator (see point 3 on the following page), and in the fifth column notes and code values used for specific data elements in the message.

2.1 (M)andatory data elements in EDIFACT segments retain their status in EANCOM®.

2.2 Additionally, there are five types of status for data elements with a (C)onditional EDIFACT status, whether for simple, component or composite data elements. These are listed below and can be identified when relevant by the following abbreviations:

   - REQUIRED   **R**   Indicates that the entity is required and must be sent.

   - ADVISED   **A**   Indicates that the entity is advised or recommended.

   - DEPENDENT   **D**   Indicates that the entity must be sent in certain conditions, as defined by the relevant explanatory note.

   - OPTIONAL   **O**   Indicates that the entity is optional and may be sent at the discretion of the user.

   - NOT USED   **N**   Indicates that the entity is not used and should be omitted.

2.3 If a composite is flagged as **N, NOT USED**, all data elements within that composite will have blank status indicators assigned to them.

3. Status indicators detailed in the fourth column which directly relate to the code values detailed in the fifth **column** may have two values:

   - RESTRICTED   *****   A data element marked with an asterisk (*) in the fourth column indicates that the listed codes in column five are the only codes available for use with this data element, in this segment, in this message.

   - OPEN   All data elements where coded representation of data is possible and a restricted set of code values is not indicated are open (no asterisk in fourth column). The available codes are listed in the EANCOM® Data Elements and Code Sets Directory. Code values may be given as examples or there may be a note on the format or type of code to be used.

4. Different colours are used for the code values in the segment details: restricted codes are in red and open codes in blue.

5. Segments Layout

Segment number: 1

UNA	- C	1 - Service string advice

Function:

To define the characters selected for use as delimiters and indicators in the rest of the interchange that follows.

		EDIFACT	GS1	*	Description
UNA1	Component data element separator	M an1	M	*	Used as a separator between component data elements contained within a composite data element (default value: ":")
UNA2	Data element separator	M an1	M	*	Used to separate two simple or composite data elements (default value: "+")
UNA3	Decimal notation	M an1	M	*	Used to indicate the character used for decimal notation (default value:".")
UNA4	Release indicator	M an1	M	*	Used to restore any service character to its original specification (value: "?").
UNA5	Reserved for future use	M an1	M	*	(default value: space)
UNA6	Segment terminator	M an1	M	*	Used to indicate the end of segment data (default value: " ' ")

Segment Notes:

The service string advice shall begin with the upper case characters UNA immediately followed by six characters in the order shown below. The same character shall not be used in more than one position of the UNA.
This segment is used to inform the receiver of the interchange that a set of service string characters which are different to the default characters are being used.
When using the default set of service characters, the UNA segment need not be sent. If it is sent, it must immediately precede the UNB segment and contain the four service string characters (positions UNA1, UNA2, UNA4 and UNA6) selected by the interchange sender.
Regardless of whether or not all of the service string characters are being changed every data element within this segment must be filled, (i.e., if some default values are being used with user defined ones, both the default and user defined values must be specified).
When expressing the service string characters in the UNA segment, it is not necessary to include any element separators.
The use of the UNA segment is required when using a character set other than level A.
UNA:+.? '

5. Segments Layout

Segment number: 2

UNB	- M	1 - Interchange header

Function:

To start, identify and specify an interchange.

		EDIFACT	GS1	*	Description
S001	SYNTAX IDENTIFIER	M	M		See Part I chapter 5.2.7 and segment notes.
0001	Syntax identifier	M a4	M	*	UNOA = UN/ECE level A UNOB = UN/ECE level B UNOC = UN/ECE level C UNOD = UN/ECE level D UNOE = UN/ECE level E UNOF = UN/ECE level F
0002	Syntax version number	M n1	M	*	3 = Version 3
S002	INTERCHANGE SENDER	M	M		
0004	Sender identification	M an..35	M		GLN (n13)
0007	Partner identification code qualifier	C an..4	R	*	14 = GS1
0008	Address for reverse routing	C an..14	O		
S003	INTERCHANGE RECIPIENT	M	M		
0010	Recipient identification	M an..35	M		GLN (n13)
0007	Partner identification code qualifier	C an..4	R	*	14 = GS1
0014	Routing address	C an..14	O		
S004	DATE/TIME OF PREPARATION	M	M		
0017	Date of preparation	M n6	M		YYMMDD
0019	Time of preparation	M n4	M		HHMM
0020	Interchange control reference	M an..14	M		Unique reference identifying the interchange. Created by the interchange sender.
S005	RECIPIENT'S REFERENCE, PASSWORD	C	O		
0022	Recipient's reference/ password	M an..14	M		
0025	Recipient's reference/ password qualifier	C an2	O		
0026	Application reference	C an..14	O		Message identification if the interchange contains only one type of message.
0029	Processing priority code	C a1	O		A = Highest priority
0031	Acknowledgement request	C n1	O		1 = Requested
0032	Communications agreement ID	C an..35	O	*	EANCOM......
0035	Test indicator	C n1	O		1 = Interchange is a test

Segment Notes:

This segment is used to envelope the interchange, as well as to identify both, the party to whom the interchange is sent and the party who has sent the interchange. The principle of the UNB segment is the same as a physical envelope which covers one or more letters or documents, and which details, both the address where delivery is to take place and the address from where the envelope has come.

5. Segments Layout

Segment number: 2

S001: The character encoding specified in basic code table of ISO/IEC 646 (7-bit coded character set for information interchange) shall be used for the interchange service string advice (if used) and up to and including the composite data element S001 'Syntax identifier' in the interchange header. The character repertoire used for the characters in an interchange shall be identified from the code value of data element 0001 in S001 'Syntax identifier' in the interchange header. The character repertoire identified does not apply to objects and/or encrypted data.

The default encoding technique for a particular repertoire shall be the encoding technique defined by its associated character set specification.

DE 0001: The recommended (default) character set for use in EANCOM® for international exchanges is character set A (UNOA). Should users wish to use character sets other than A, an agreement on which set to use should be reached on a bilateral basis before communications begin.

DE 0004, 0008, 0010, 0014, 0042 and 0046: Within EANCOM® the use of the Global Location Number (GLN) is recommended for the identification of the interchange sender and recipient.

DE 0008: Identification (e.g. a division) specified by the sender of the interchange, to be included if agreed, by the recipient in response interchanges, to facilitate internal routing.

DE 0042: Sub-level of sender internal identification, when further sub-level identification is required.

DE 0014: The address for routing, provided beforehand by the interchange recipient, is used by the interchange sender to inform the recipient of the internal address, within the latter's systems, to which the interchange should be routed. It is recommended that the GLN be used for this purpose.

DE 0007: Identification (e.g. a division) specified by the recipient of the interchange, to be included if agreed, by the sender in response interchanges, to facilitate internal routing.

DE 0046: Sub-level of recipient internal identification, when further sub-level identification is required.

DE S004: The date and time specified in this composite should be the date and time at which the interchange sender prepared the interchange. This date and time may not necessarily be the same as the date and time of contained messages.

DE 0020: The interchange control reference number is generated by the interchange sender and is used to identify uniquely each interchange. Should the interchange sender wish to re-use interchange control reference numbers, it is recommended that each number be preserved for at least a period of three months before being re-used. In order to guarantee uniqueness, the interchange control reference number should always be linked to the interchange sender's identification (DE 0004).

DE S005: The use of passwords must first be agreed bilaterally by the parties exchanging the interchange.

DE 0026: This data element is used to identify the application, on the interchange recipient's system, to which the interchange is directed. This data element may only be used if the interchange contains only one type of message, (e.g. only invoices). The reference used in this data element is assigned by the interchange sender.

DE 0031: This data element is used to indicate whether an acknowledgement to the interchange is required. The EANCOM® APERAK or CONTRL message should be used to provide acknowledgement of interchange receipt. In addition, the EANCOM® CONTRL message may be used to indicate when an interchange has been rejected due to syntax errors.

DE 0032: This data element is used to identify any underlying agreements which control the exchange of data. Within EANCOM® , the identity of such agreements must start with the letters 'EANCOM', the remaining characters within the data element being filled according to bilateral agreements.

UNB+UNOA:3+5412345678908:14+8798765432106:14+020102:1000+12345555+++++EANCOMREF 52'

5. Segments Layout

Segment number: 3

UNH	- M	1 - Message header			
Function:					
To head, identify and specify a message.					

		EDIFACT	GS1	*	Description
0062	Message reference number	M an..14	M		Senders unique message reference. Sequence number of messages in the interchange. DE 0062 in UNT will have the same value. Generated by the sender.
S009	MESSAGE IDENTIFIER	M	M		
0065	Message type	M an..6	M	*	COACSU = Commercial account summary message
0052	Message version number	M an..3	M	*	D = Draft version/UN/EDIFACT Directory
0054	Message release number	M an..3	M	*	01B = Release 2001 - B
0051	Controlling agency	M an..2	M	*	UN = UN/CEFACT
0057	Association assigned code	C an..6	R	*	EAN004 = GS1 version control number (GS1 Permanent Code) Indicates that the message is the EANCOM version 004 of the UNSM Commercial Account Summary.
0068	Common access reference	C an..35	N		
S010	STATUS OF THE TRANSFER	C	N		
0070	Sequence of transfers	M n..2			
0073	First and last transfer	C a1			

Segment Notes:
This segment is used to head, identify and specify a message.
DE's 0065, 0052, and 0054: Indicate that the message is a UNSM Commercial Account Summary message based on the D.01B EDIFACT directory.
Example:
UNH+ME000001+COACSU:D:01B:UN:EAN004'

5. Segments Layout

Segment number: 4

BGM	- M	1 - Beginning of message				
Function:						
To indicate the type and function of a message and to transmit the identifying number.						
		EDIFACT	GS1	*	Description	
C002	DOCUMENT/MESSAGE NAME	C	**R**			
1001	Document name code	C an..3	**R**	*	397 = Commercial account summary response 731 = Commercial account summary	
1131	Code list identification code	C an..17	**N**			
3055	Code list responsible agency code	C an..3	**D**	*	9 = GS1	
1000	Document name	C an..35	**O**			
C106	DOCUMENT/MESSAGE IDENTIFICATION	C	**R**			
1004	Document identifier	C an..35	**R**		Number of the COACSU document assigned by document sender. For global unique identification of documents Global Document Type Identifier (GDTI) is available.	
1056	Version identifier	C an..9	**N**			
1060	Revision identifier	C an..6	**N**			
1225	Message function code	C an..3	**R**	*	9 = Original 9 = Original - An original transmission of a commercial account summary.	
4343	Response type code	C an..3	**N**			
Segment Notes:						
This segment is used to indicate the type and function of a message and to transmit the identifying number. Example: BGM+731::9+CA5422+9' This example identifies the document as being an original commercial account summary with the reference number CA5422.						

5. Segments Layout

Segment number: 5

DTM	- M	9 - Date/time/period

Function:
To specify date, and/or time, or period.

		EDIFACT	GS1	*	Description
C507	DATE/TIME/PERIOD	M	**M**		
2005	Date or time or period function code qualifier	M an..3	**M**		137 = Document/message date/time 263 = Invoicing period 322 = Accounting period 325 = Tax period
2380	Date or time or period value	C an..35	**R**		
2379	Date or time or period format code	C an..3	**R**		102 = CCYYMMDD 718 = CCYYMMDD-CCYYMMDD

Segment Notes:

This segment is used to specify any dates related to the commercial account summary.
DE 2005: Identification of the 'Document/message date/time' (code value 137) is mandatory in an EANCOM message.

Example:
DTM+137:20020701:102'
DTM+263:2002060120020630:718'
The commercial account summary has a message date of the 1st of July 2002 and covers the invoicing period of the 1st of June 2002 to the 30th of June 2002.

5. Segments Layout

Segment number: 6

FTX	- C	99 - Free text				

Function:

To provide free form or coded text information.

		EDIFACT	GS1	*	Description	
4451	Text subject code qualifier	M an..3	M		ABN = Accounting information ZZZ = Mutually defined	
4453	Free text function code	C an..3	O	*	1 = Text for subsequent use	
C107	TEXT REFERENCE	C	D		This composite is only used when trading partners have agreed to use mutually defined code values.	
4441	Free text value code	M an..17	M		001 = Reference to standard text between trading partners.	
1131	Code list identification code	C an..17	O			
3055	Code list responsible agency code	C an..3	D		91 = Assigned by supplier or supplier's agent 92 = Assigned by buyer or buyer's agent	
C108	TEXT LITERAL	C	D		This composite is only used if coded text can not be used.	
4440	Free text value	M an..512	M			
4440	Free text value	C an..512	O			
4440	Free text value	C an..512	O			
4440	Free text value	C an..512	O			
4440	Free text value	C an..512	O			
3453	Language name code	C an..3	D		ISO 639 two alpha code This data element is only used when non coded free text has been provided in data element C108.	
4447	Free text format code	C an..3	N			

Segment Notes:

This segment is used to provide additional free text information related to the entire message.
Use of this segment in free form is not recommended since in most cases it inhibits automatic processing of the commercial account summary. Coded references to standard texts is an available functionality which enables automatic processing and reduces transmission and processing overheads. Standard texts should be mutually defined among trading partners and can be used to cover legal and other requirements.

Example:
FTX+ABN+1+001::91'
(E.g. Accounting information standard text code 001 = Please note payment and penalty terms).

5. Segments Layout

Segment number: 7

SG1	- C	9 - RFF
RFF	- M	1 - Reference

Function:

To specify a reference.

		EDIFACT	GS1	*	Description
C506	REFERENCE	M	**M**		

1153	Reference code qualifier	M an..3	**M**		ABO = Originator's reference
					CT = Contract number
					AE = Authorization for expense (AFE)
					      number
					AKO = Action authorization number
					ANJ = Authorization number
					APQ = Commercial account summary
					      reference number
					PQ = Payment reference

1154	Reference identifier	C an..70	**R**		
1156	Document line identifier	C an..6	**N**		
4000	Reference version identifier	C an..35	**N**		
1060	Revision identifier	C an..6	**N**		

Segment Notes:

This segment is used to provide references related to the heading section.

Example:
RFF+CT:TT76GZ45'

5. Segments Layout

Segment number: 8

SG2	- C	99 -	NAD-FII-SG3-SG4
NAD	- M	1 -	Name and address

Function:

To specify the name/address and their related function, either by C082 only and/or unstructured by C058 or structured by C080 thru 3207.

		EDIFACT	GS1	*	Description
3035	Party function code qualifier	M an..3	**M**		AB = Buyer's agent/representative BY = Buyer CO = Corporate office II = Issuer of invoice IV = Invoicee PE = Payee PR = Payer SR = Supplier's agent/representative SU = Supplier
C082	PARTY IDENTIFICATION DETAILS	C	**A**		
3039	Party identifier	M an..35	**M**		For identification of parties it is recommended to use GLN - Format n13.
1131	Code list identification code	C an..17	**N**		
3055	Code list responsible agency code	C an..3	**R**	*	9 = GS1
C058	NAME AND ADDRESS	C	**O**		This composite may only be used to fulfill the requirements of directive 2003/58/EC, article 4.
3124	Name and address description	M an..35	**M**		
3124	Name and address description	C an..35	**O**		
3124	Name and address description	C an..35	**O**		
3124	Name and address description	C an..35	**O**		
3124	Name and address description	C an..35	**O**		
C080	PARTY NAME	C	**D**		
3036	Party name	M an..35	**M**		Party Name in clear text.
3036	Party name	C an..35	**O**		
3036	Party name	C an..35	**O**		
3036	Party name	C an..35	**O**		
3036	Party name	C an..35	**O**		
3045	Party name format code	C an..3	**O**		
C059	STREET	C	**D**		
3042	Street and number or post office box identifier	M an..35	**M**		Building Name/Number and Street Name
3042	Street and number or post office box identifier	C an..35	**O**		
3042	Street and number or post office box identifier	C an..35	**O**		
3042	Street and number or post office box identifier	C an..35	**O**		
3164	City name	C an..35	**D**		City/Town name, clear text

5. Segments Layout

Segment number: 8

		EDIFACT	GS1	*	Description
C819	COUNTRY SUB-ENTITY DETAILS	C	**D**		
3229	Country sub-entity name code	C an..9	**O**		
1131	Code list identification code	C an..17	**O**		
3055	Code list responsible agency code	C an..3	**O**		
3228	Country sub-entity name	C an..70	**O**		County/State, clear text.
3251	Postal identification code	C an..17	**D**		Postal Code
3207	Country name code	C an..3	**D**		ISO 3166 two alpha code

Segment Notes:

This segment is used to identify the trading parties involved in the commercial account summary process. Identification of the buyer and supplier of goods and services is recommended in the commercial account summary.

Example:
NAD+BY+5412345123453::9'
NAD+SU+5411111123451::9'

Dependency Notes:
The following composites and data elements are only used when a coded name and address can not be used.
The affected composites and data elements are as follows:
C080 - C059 - 3164 - C819 - 3251 - 3207

5. Segments Layout

Segment number: 9

SG2	- C	99 - NAD-FII-SG3-SG4			
FII	- C	9 - Financial institution information			

Function:

To identify an account and a related financial institution.

		EDIFACT	GS1	*	Description
3035	Party function code qualifier	M an..3	**M**		PB = Paying financial institution RB = Receiving financial institution
C078	ACCOUNT HOLDER IDENTIFICATION	C	**R**		
3194	Account holder identifier	C an..35	**R**		
3192	Account holder name	C an..35	**O**		
3192	Account holder name	C an..35	**O**		
6345	Currency identification code	C an..3	**O**		ISO 4217 three alpha code
C088	INSTITUTION IDENTIFICATION	C	**D**		In some countries it is possible to identify within the account number the institution name and branch. Where this is possible the composite C088 will not be required. For international transactions it is recommended that the need for composite C088 should be checked before sending the message. When using C088 it is recommended that if data element 3433 is not used that 3432 be used, and that when data element 3434 is not used that data element 3436 be used.
3433	Institution name code	C an..11	**A**		
1131	Code list identification code	C an..17	**C**		25 = Bank identification
3055	Code list responsible agency code	C an..3	**D**		5 = ISO (International Organization for Standardization)
3434	Institution branch identifier	C an..17	**O**		
1131	Code list identification code	C an..17	**O**		
3055	Code list responsible agency code	C an..3	**D**		
3432	Institution name	C an..70	**O**		
3436	Institution branch location name	C an..70	**O**		
3207	Country name code	C an..3	**O**		ISO 3166 two alpha code

Segment Notes:

This segment is used to identify the financial institution and account details of the party identified in the previous NAD segment.

Example:
FII+PB+24680123+KREDBEBB:25:5'
The bank receiving the commercial account summary message is identified using the bank identification code KREDBEBB (which is maintained by ISO).

5. Segments Layout

Segment number: 10

SG2	- C	99	- NAD-FII-SG3-SG4
SG3	- C	9	- RFF
RFF	- M	1	- Reference

Function:

To specify a reference.

		EDIFACT	GS1	*	Description
C506	REFERENCE	M	**M**		
1153	Reference code qualifier	M an..3	**M**	*	AWX = Company trading account number GN = Government reference number VA = VAT registration number XA = Company/place registration number YC1 = Additional party identification (GS1 Temporary Code)
1154	Reference identifier	C an..70	**R**		
1156	Document line identifier	C an..6	**N**		
4000	Reference version identifier	C an..35	**N**		
1060	Revision identifier	C an..6	**N**		

Segment Notes:

This segment is used to specify reference numbers related to the parties identified in the previous NAD segment.

Example:
RFF+VA:VR12345'

5. Segments Layout

Segment number: 11

SG2	- C	99	- NAD-FII-SG3-SG4			
SG4	- C	9	- CTA-COM			
CTA	- M	1	- Contact information			

Function:

To identify a person or a department to whom communication should be directed.

		EDIFACT	GS1	*	Description
3139	Contact function code	C an..3	**R**		AD = Accounting contact AP = Accounts payable contact AR = Accounts receivable contact
C056	DEPARTMENT OR EMPLOYEE DETAILS	C	**O**		
3413	Department or employee name code	C an..17	**O**		
3412	Department or employee name	C an..35	**O**		

Segment Notes:

This segment is used to identify the department and/or person within the party specified in the NAD.
Global Location Number GLN - Format n13 - is particularly suitable for this purpose.

Example:
CTA+AD+:MARK CARTER'

5. Segments Layout

Segment number: 12

SG2	- C	99 -	NAD-FII-SG3-SG4
SG4	- C	9 -	CTA-COM
COM	- C	9 -	Communication contact

Function:

To identify a communication number of a department or a person to whom communication should be directed.

		EDIFACT	GS1	*	Description
C076	COMMUNICATION CONTACT	M	**M**		
3148	Communication address identifier	M an..512	**M**		
3155	Communication address code qualifier	M an..3	**M**		EI = EDI EM = Electronic mail TE = Telephone AO = Uniform Resource Location (URL)

Segment Notes:

This segment is used to identify the communications number and the type of communications used for the person and/or department identified in the CTA segment.

Example:
COM+00448132445322:TE'

5. Segments Layout

Segment number: 13

SG5	- C	9 - CUX
CUX	- M	1 - Currencies

Function:

To specify currencies used in the transaction and relevant details for the rate of exchange.

		EDIFACT	GS1	*	Description
C504	CURRENCY DETAILS	C	R		
6347	Currency usage code qualifier	M an..3	M	*	2 = Reference currency
6345	Currency identification code	C an..3	R		ISO 4217 three alpha
6343	Currency type code qualifier	C an..3	R		4 = Invoicing currency 11 = Payment currency
6348	Currency rate value	C n..4	N		
C504	CURRENCY DETAILS	C	N		
6347	Currency usage code qualifier	M an..3			
6345	Currency identification code	C an..3			
6343	Currency type code qualifier	C an..3			
6348	Currency rate value	C n..4			
5402	Currency exchange rate	C n..12	N		
6341	Exchange rate currency market identifier	C an..3	N		

Segment Notes:

This segment is used to specify the currency applicable to all monetary amounts detailed in the message.
As the message is a single currency message the second occurrence of C504 and data element 5402 should not be used.

Example:
CUX+2:EUR:11'

5. Segments Layout

Segment number: 14

SG6	- C	9 - PYT-MOA-PCD-DTM-FII-PAI
PYT	- M	1 - Payment terms

Function:

To specify the terms of payment.

		EDIFACT	GS1	*	Description
4279	Payment terms type code qualifier	M an..3	**M**		1 = Basic
					3 = Fixed date
					7 = Extended
					20 = Penalty terms
					21 = Payment by instalment
					22 = Discount
C019	PAYMENT TERMS	C	**N**		
4277	Payment terms description identifier	C an..17			
1131	Code list identification code	C an..17			
3055	Code list responsible agency code	C an..3			
4276	Payment terms description	C an..35			
2475	Time reference code	C an..3	**O**		7 = Date of present document
2009	Terms time relation code	C an..3	**O**		3 = After reference
2151	Period type code	C an..3	**O**		D = Day
					M = Month
					WD = Working days
					Y = Year
2152	Period count quantity	C n..3	**O**		Number of periods for payment.

Segment Notes:

This segment is used by the issuer of the commercial account summary to specify payment terms applicable to the complete message.

Example:
The following example indicates basic payment terms with payment due 30 days after the reference date which is the date of the present commercial account summary.
PYT+1++7+3+D+30'

5. Segments Layout

Segment number: 15

SG6	- C	9 - PYT-MOA-PCD-DTM-FII-PAI
MOA	- C	9 - Monetary amount

Function:

To specify a monetary amount.

		EDIFACT	GS1	*	Description
C516	MONETARY AMOUNT	M	**M**		
5025	Monetary amount type code qualifier	M an..3	**M**		21 = Cash discount 23 = Charge amount 28E = Financing allowance/charge (GS1 Temporary Code)
5004	Monetary amount	C n..35	**R**		Actual value being charged/discounted.
6345	Currency identification code	C an..3	**N**		
6343	Currency type code qualifier	C an..3	**N**		
4405	Status description code	C an..3	**N**		

Segment Notes:

This segment is used to specify monetary values which will be allowed or charged if the party receiving the message pays (does not pay) to terms.

Example:
MOA+21:100'

5. Segments Layout

Segment number: 16

SG6	- C	9 - PYT-MOA-PCD-DTM-FII-PAI
PCD	- C	9 - Percentage details

Function:

To specify percentage information.

		EDIFACT	GS1	*	Description
C501	PERCENTAGE DETAILS	M	**M**		
5245	Percentage type code qualifier	M an..3	**M**		7 = Percentage of invoice 12 = Discount 15 = Penalty percentage 16 = Interest percentage
5482	Percentage	C n..10	**R**		
5249	Percentage basis identification code	C an..3	**O**		13 = Invoice value
1131	Code list identification code	C an..17	**O**		
3055	Code list responsible agency code	C an..3	**D**		
4405	Status description code	C an..3	**N**		

Segment Notes:

This segment is used to specify percentages which will be allowed or charged if the party receiving the message pays (does not pay) to terms.

Example:
PCD+15:2.5:13'

5. Segments Layout

Segment number: 17

SG6	- C	9 - PYT-MOA-PCD-DTM-FII-PAI				
DTM	- C	9 - Date/time/period				

Function:

To specify date, and/or time, or period.

		EDIFACT	GS1	*	Description	
C507	DATE/TIME/PERIOD	M	**M**			
2005	Date or time or period function code qualifier	M an..3	**M**	*	12 = Terms discount due date/time 13 = Terms net due date 209 = Value date	
2380	Date or time or period value	C an..35	**R**			
2379	Date or time or period format code	C an..3	**R**		102 = CCYYMMDD 203 = CCYYMMDDHHMM	

Segment Notes:

This segment is used to specify any dates associated with the payment terms.

Example:
DTM+13:20020831:102'
Net due date for payment is the 31st August 2002.

5. Segments Layout

Segment number: 18

SG6	- C	9 -	PYT-MOA-PCD-DTM-FII-PAI	
FII	- C	1 -	Financial institution information	

Function:

To identify an account and a related financial institution.

		EDIFACT	GS1	*	Description
3035	Party function code qualifier	M an..3	**M**		OR = Ordered bank
C078	ACCOUNT HOLDER IDENTIFICATION	C	**R**		
3194	Account holder identifier	C an..35	**R**		
3192	Account holder name	C an..35	**O**		
3192	Account holder name	C an..35	**O**		
6345	Currency identification code	C an..3	**O**		ISO 4217 three alpha code
C088	INSTITUTION IDENTIFICATION	C	**R**		When using C088 it is recommended that if data element 3433 is not used that 3432 be used, and that when data element 3434 is not used that data element 3436 be used.
3433	Institution name code	C an..11	**R**		
1131	Code list identification code	C an..17	**O**		25 = Bank identification
3055	Code list responsible agency code	C an..3	**D**		5 = ISO (International Organization for Standardization)
3434	Institution branch identifier	C an..17	**O**		
1131	Code list identification code	C an..17	**O**		
3055	Code list responsible agency code	C an..3	**D**		
3432	Institution name	C an..70	**O**		
3436	Institution branch location name	C an..70	**O**		
3207	Country name code	C an..3	**O**		ISO 3166 two alpha code

Segment Notes:

This segment is used to specify any financial institution information which is specific to the payment terms previously detailed.

Example:
FII+MR++KREDBEBB:25:5'
The bank receiving the commercial account summary message is identified using the bank identification code KREDBEBB (which is maintained by ISO).

5. Segments Layout

Segment number: 19

SG6	- C	9 - PYT-MOA-PCD-DTM-FII-PAI				
PAI	- C	9 - Payment instructions				
Function:						
To specify the instructions for payment.						
		EDIFACT	GS1	*	Description	
C534	PAYMENT INSTRUCTION DETAILS	M	**M**			
4439	Payment conditions code	C an..3	**O**			
4431	Payment guarantee means code	C an..3	**O**			
4461	Payment means code	C an..3	**O**		42 = Payment to bank account	
1131	Code list identification code	C an..17	**O**			
3055	Code list responsible agency code	C an..3	**D**			
4435	Payment channel code	C an..3	**O**			
Segment Notes:						
This segment is used to specify any payment instructions which are specific to the current payment terms. Example: PAI+::42'						

5. Segments Layout

Segment number: 20

SG7	- C	99999	- DOC-DTM-SG8-SG10
DOC	- M	1	- Document/message details

Function:

To identify documents and details directly related to it.

		EDIFACT	GS1	*	Description
C002	DOCUMENT/MESSAGE NAME	M	**M**		
1001	Document name code	C an..3	**R**		82 = Metered services invoice 83 = Credit note related to financial adjustments 84 = Debit note related to financial adjustments 380 = Commercial invoice 381 = Credit note - goods and services 383 = Debit note - goods and services 385 = Consolidated invoice 386 = Prepayment invoice 389 = Self-billed invoice 390 = Delcredere invoice 393 = Factored invoice 481 = Remittance advice
1131	Code list identification code	C an..17	**O**		
3055	Code list responsible agency code	C an..3	**D**		
1000	Document name	C an..35	**N**		
C503	DOCUMENT/MESSAGE DETAILS	C	**R**		
1004	Document identifier	C an..35	**R**		
1373	Document status code	C an..3	**N**		
1366	Document source description	C an..70	**N**		
3453	Language name code	C an..3	**N**		
1056	Version identifier	C an..9	**N**		
1060	Revision identifier	C an..6	**N**		
3153	Communication medium type code	C an..3	**N**		
1220	Document copies required quantity	C n..2	**N**		
1218	Document originals required quantity	C n..2	**N**		

Segment Notes:

This segment is used to identify the document for which summary information is being provided.

Example:
DOC+380+253-94'

5. Segments Layout

Segment number: 21

SG7	- C	99999 - DOC-DTM-SG8-SG10
DTM	- C	9 - Date/time/period

Function:

To specify date, and/or time, or period.

		EDIFACT	GS1	*	Description
C507	DATE/TIME/PERIOD	M	**M**		
2005	Date or time or period function code qualifier	M an..3	**M**	*	137 = Document/message date/time 140 = Payment due date
2380	Date or time or period value	C an..35	**R**		
2379	Date or time or period format code	C an..3	**R**		102 = CCYYMMDD 718 = CCYYMMDD-CCYYMMDD

Segment Notes:

This segment is used to specify dates or periods relating to the documents given in the previous DOC segment.

Example:
DTM+137:20020511:102'

5. Segments Layout

Segment number: 22

SG7	- C	99999	-	DOC-DTM-SG8-SG10
SG8	- C	9	-	NAD-SG9
NAD	- M	1	-	Name and address

Function:

To specify the name/address and their related function, either by C082 only and/or unstructured by C058 or structured by C080 thru 3207.

		EDIFACT	GS1	*	Description
3035	Party function code qualifier	M an..3	M		AB = Buyer's agent/representative BY = Buyer CO = Corporate office DP = Delivery party II = Issuer of invoice IV = Invoicee PE = Payee PR = Payer SR = Supplier's agent/representative SU = Supplier
C082	PARTY IDENTIFICATION DETAILS	C	A		
3039	Party identifier	M an..35	M		For identification of parties it is recommended to use GLN - Format n13.
1131	Code list identification code	C an..17	N		
3055	Code list responsible agency code	C an..3	R	*	9 = GS1
C058	NAME AND ADDRESS	C	O		This composite may only be used to fulfill the requirements of directive 2003/58/EC, article 4.
3124	Name and address description	M an..35	M		
3124	Name and address description	C an..35	O		
3124	Name and address description	C an..35	O		
3124	Name and address description	C an..35	O		
3124	Name and address description	C an..35	O		
C080	PARTY NAME	C	D		
3036	Party name	M an..35	M		Party Name in clear text.
3036	Party name	C an..35	O		
3036	Party name	C an..35	O		
3036	Party name	C an..35	O		
3036	Party name	C an..35	O		
3045	Party name format code	C an..3	O		
C059	STREET	C	D		
3042	Street and number or post office box identifier	M an..35	M		Building Name/Number and Street Name
3042	Street and number or post office box identifier	C an..35	O		
3042	Street and number or post office box identifier	C an..35	O		
3042	Street and number or post office box identifier	C an..35	O		

5. Segments Layout

Segment number: 22

		EDIFACT	GS1	*	Description
3164	City name	C an..35	**D**		City/Town name, clear text
C819	COUNTRY SUB-ENTITY DETAILS	C	**D**		
3229	Country sub-entity name code	C an..9	**O**		
1131	Code list identification code	C an..17	**O**		
3055	Code list responsible agency code	C an..3	**O**		
3228	Country sub-entity name	C an..70	**O**		County/State, clear text.
3251	Postal identification code	C an..17	**D**		Postal Code
3207	Country name code	C an..3	**D**		ISO 3166 two alpha code

Segment Notes:

This segment is used to identify the parties associated with the document identified in the DOC segment.

Example:
NAD+DP+5412345111115::9'

Dependency Notes:
The following composites and data elements are only used when a coded name and address can not be used.
The affected composites and data elements are as follows:
C080 - C059 - 3164 - C819 - 3251 - 3207

5. Segments Layout

Segment number: 23

SG7	- C	99999 - DOC-DTM-SG8-SG10
SG8	- C	9 - NAD-SG9
SG9	- C	99 - RFF-DTM
RFF	- M	1 - Reference

Function:

To specify a reference.

		EDIFACT	GS1	*	Description
C506	REFERENCE	M	**M**		
1153	Reference code qualifier	M an..3	**M**		AAK = Despatch advice number BO = Blanket order number DQ = Delivery note number ON = Order number (buyer) PL = Price list number RA = Remittance advice number VN = Order number (supplier)
1154	Reference identifier	C an..70	**R**		
1156	Document line identifier	C an..6	**O**		
4000	Reference version identifier	C an..35	**N**		
1060	Revision identifier	C an..6	**N**		

Segment Notes:

This segment is used to specify reference numbers related to the parties identified in the previous NAD segment.

Example:
RFF+ON:VR12345'

5. Segments Layout

Segment number: 24

SG7	- C	99999 -	DOC-DTM-SG8-SG10
SG8	- C	9 -	NAD-SG9
SG9	- C	99 -	RFF-DTM
DTM	- C	9 -	Date/time/period

Function:

To specify date, and/or time, or period.

		EDIFACT	GS1	*	Description
C507	DATE/TIME/PERIOD	M	**M**		
2005	Date or time or period function code qualifier	M an..3	**M**	*	171 = Reference date/time

5. Segments Layout

Segment number: 36

UNZ	- M	1	- Interchange trailer

Function:
To end and check the completeness of an interchange.

		EDIFACT	GS1	*	Description
0036	Interchange control count	M n..6	**M**		Number of messages or functional groups within an interchange.
0020	Interchange control reference	M an..14	**M**		Identical to DE 0020 in UNB segment.

Segment Notes:
This segment is used to provide the trailer of an interchange. UNZ+5+12345555' DE 0036: If functional groups are used, this is the number of functional groups within the interchange. If functional groups are not used, this is the number of messages within the interchange.

6. Examples

Example 1

The following is an example of a commercial account summary message between a supplier identified by GLN 5411111123451 and a buyer identified by GLN 5412345123453. The message sent on the 1st of July 2002 covers the invoicing period of the 1st to the 30th of June 2002 and has the message number CA5422. The payment currency of the message is defined as being the Euro (EUR).

The message details three transactions, an outstanding invoice and two payments.

The invoice 56241 dated the 14th of May 2002 with the value of 5300 EUR is indicated as being outstanding.

The payments are identified by the remittance advice numbers 3412 and 3480 and are dated the 12th and 25th of June 2002 respectively. Remittance advice 3480 details a payment of 12800 for the full amount invoiced.

The amount remitted for remittance advice number 3412 was 65000 EUR. An adjustment of 7000 EUR was made due to an invoice error and the delivery note number 391 is quoted as supporting information for the actual delivery.

The summary section of the message details the remitted amounts and the outstanding amount by tax rate. 29800 EUR was remitted at 10% VAT, 6000 EUR at 12% VAT, and 42000 EUR at 21% VAT. The outstanding amount of 5300 EUR for the invoice 56241 is detailed as being all at the VAT rate of 21%.
